

FIG. 1

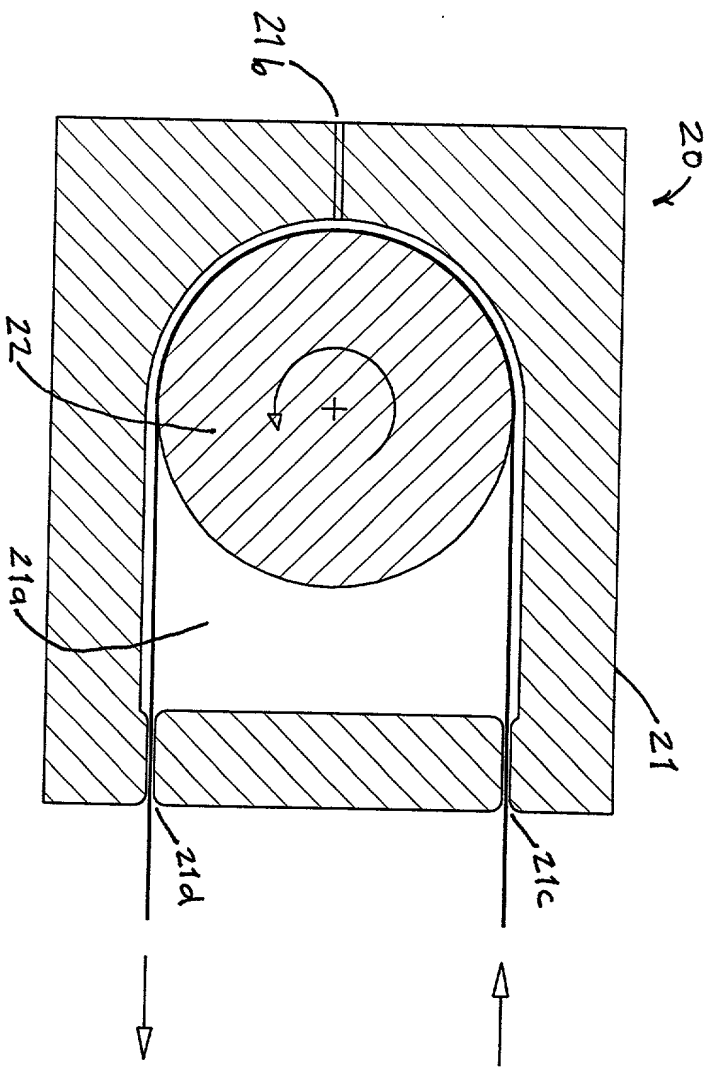

FIG. 2

FIG. 2 is a perspective view of the device 20, showing the semi-circular cutout 21 and the horizontal line 21d.

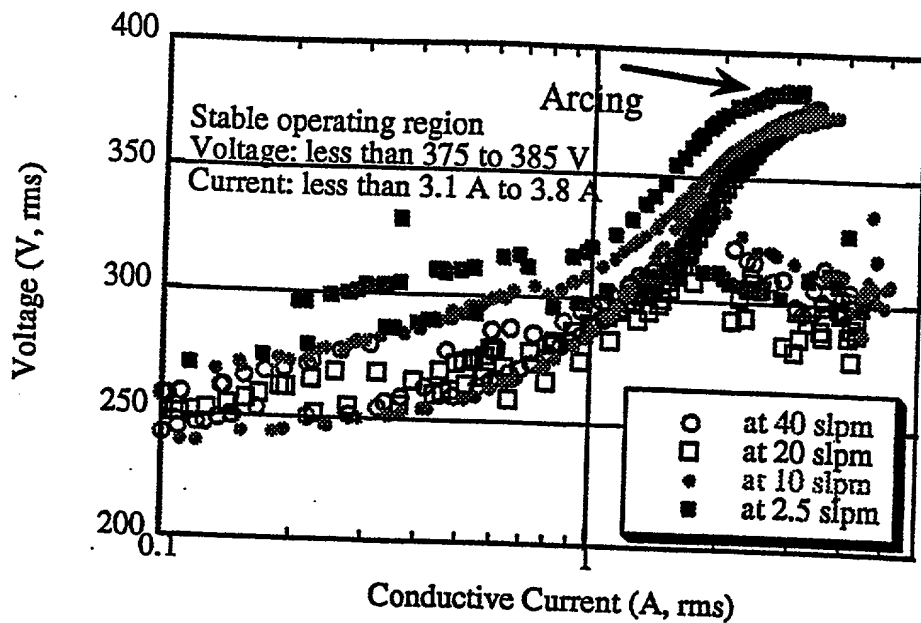

FIG 3A

Stable operating region (voltage and current) of atmospheric-pressure plasma discharge for various gas flow rates from 2.5 slpm to 40 slpm at a gas composition of 98% He and 2% O<sub>2</sub>.

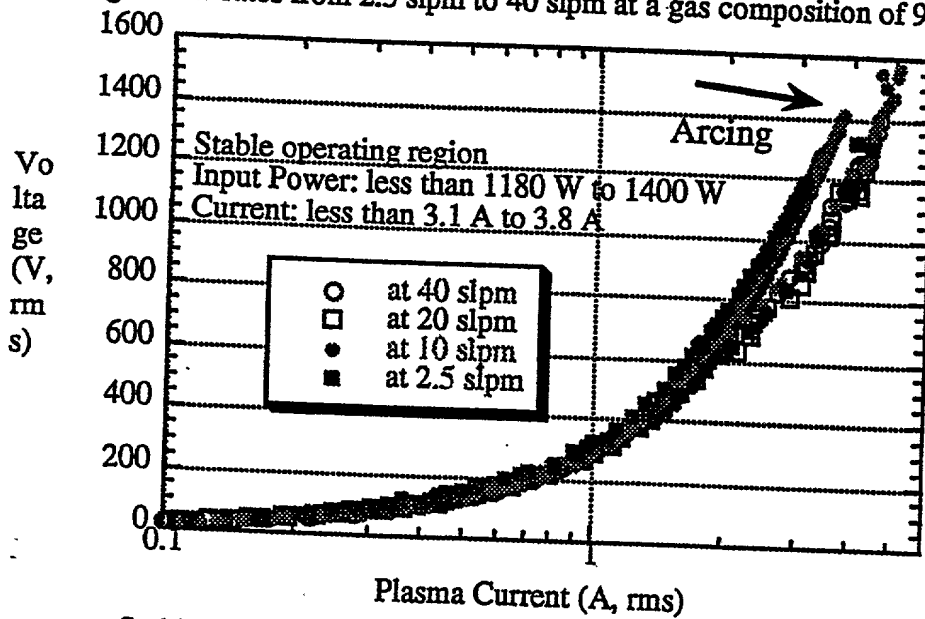

FIG 3B

Stable operating region (input power and current) of atmospheric-pressure plasma discharge for various gas flow rates from 2.5 slpm to 40 slpm at a gas composition of 98% He and 2% O<sub>2</sub>.

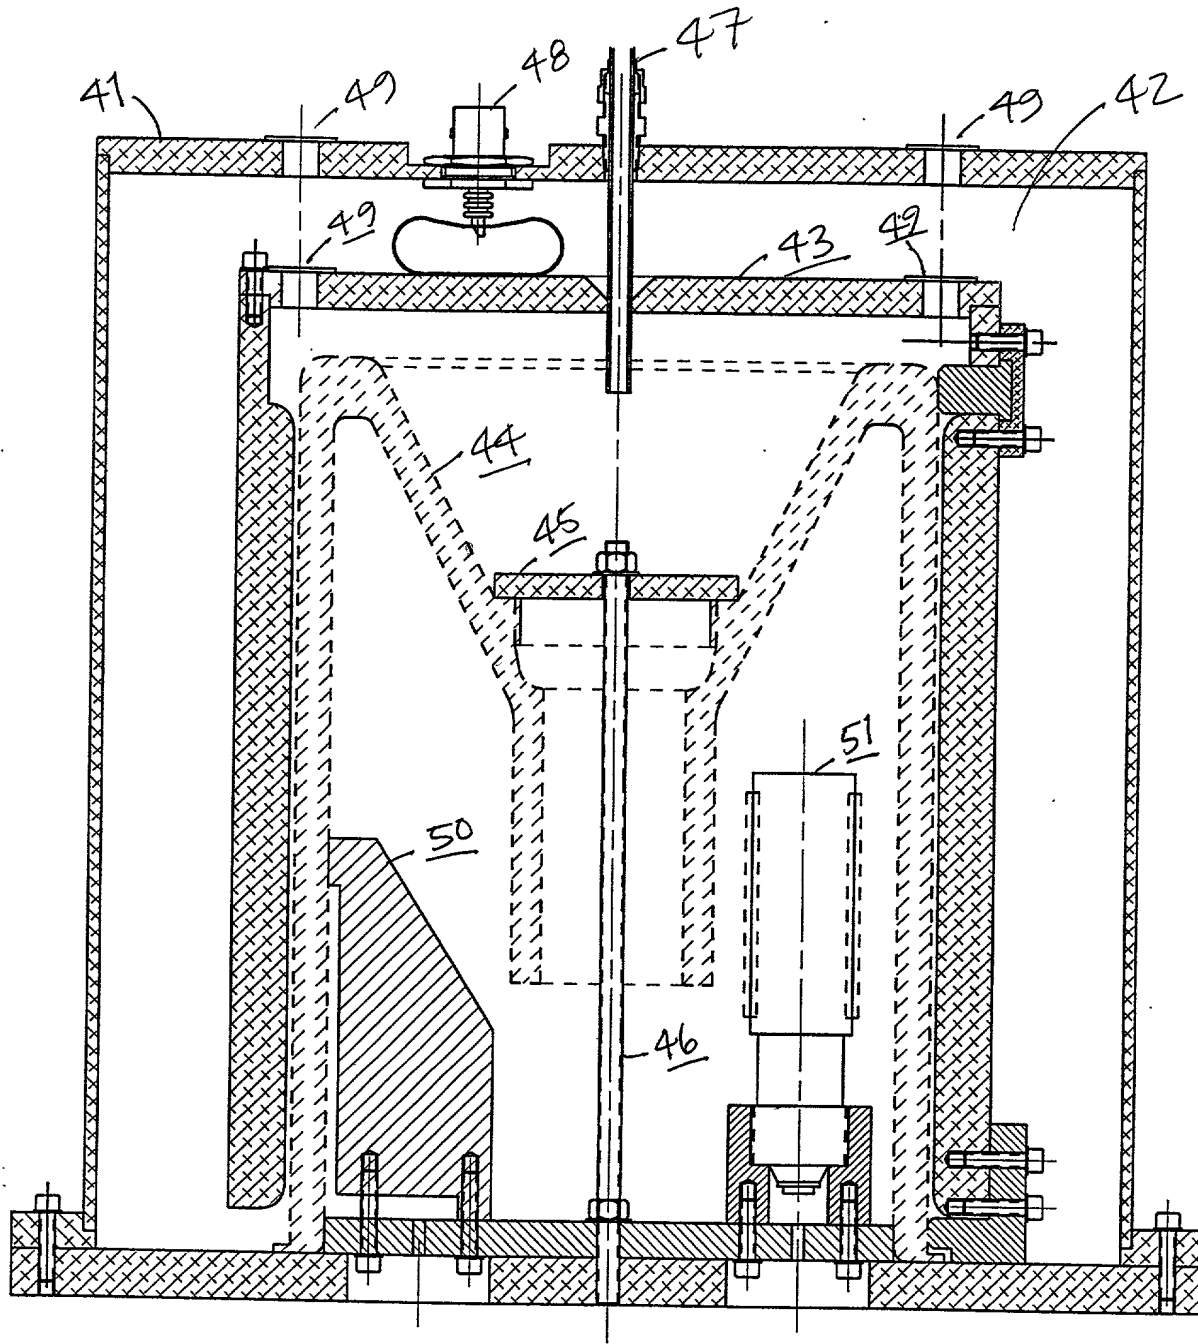

FIG. 4
